Movie Application

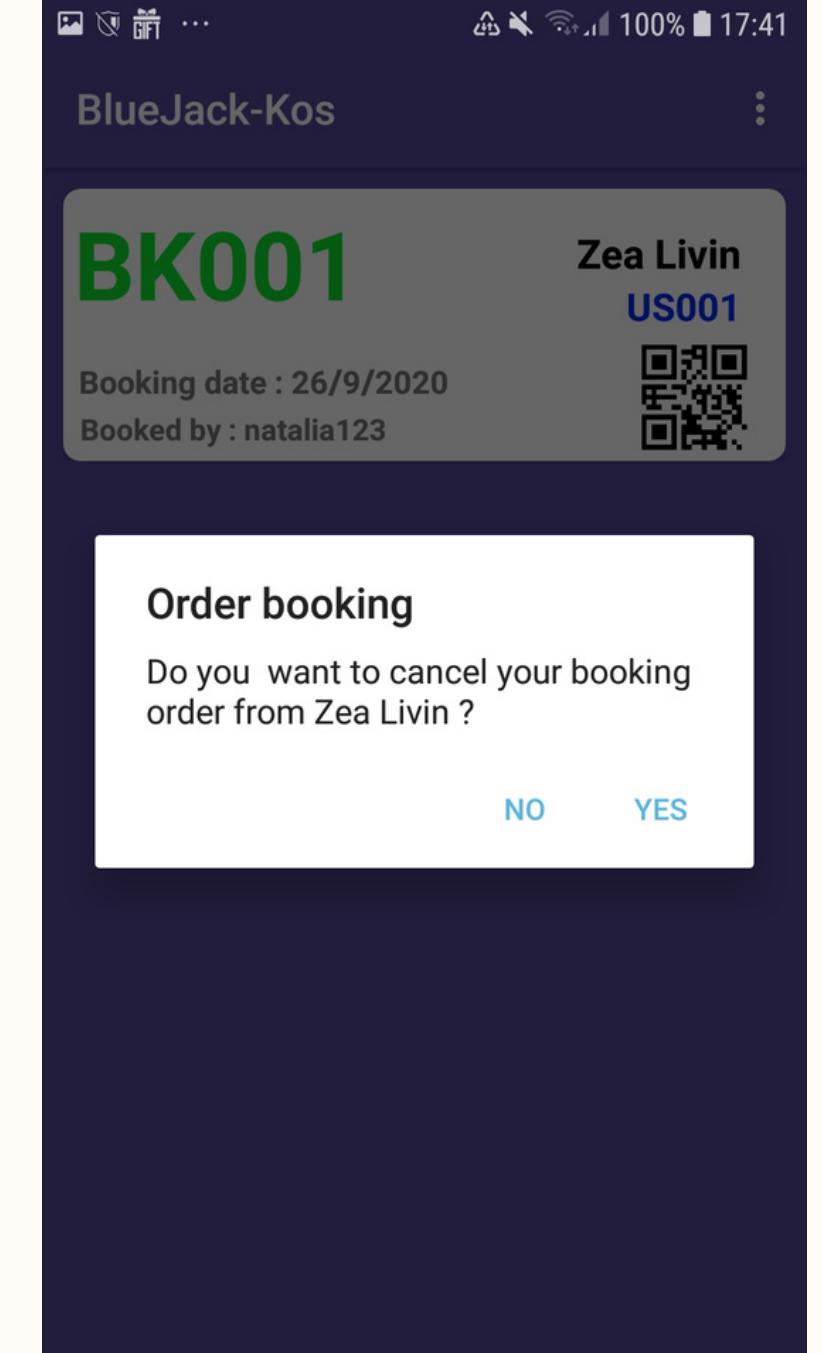

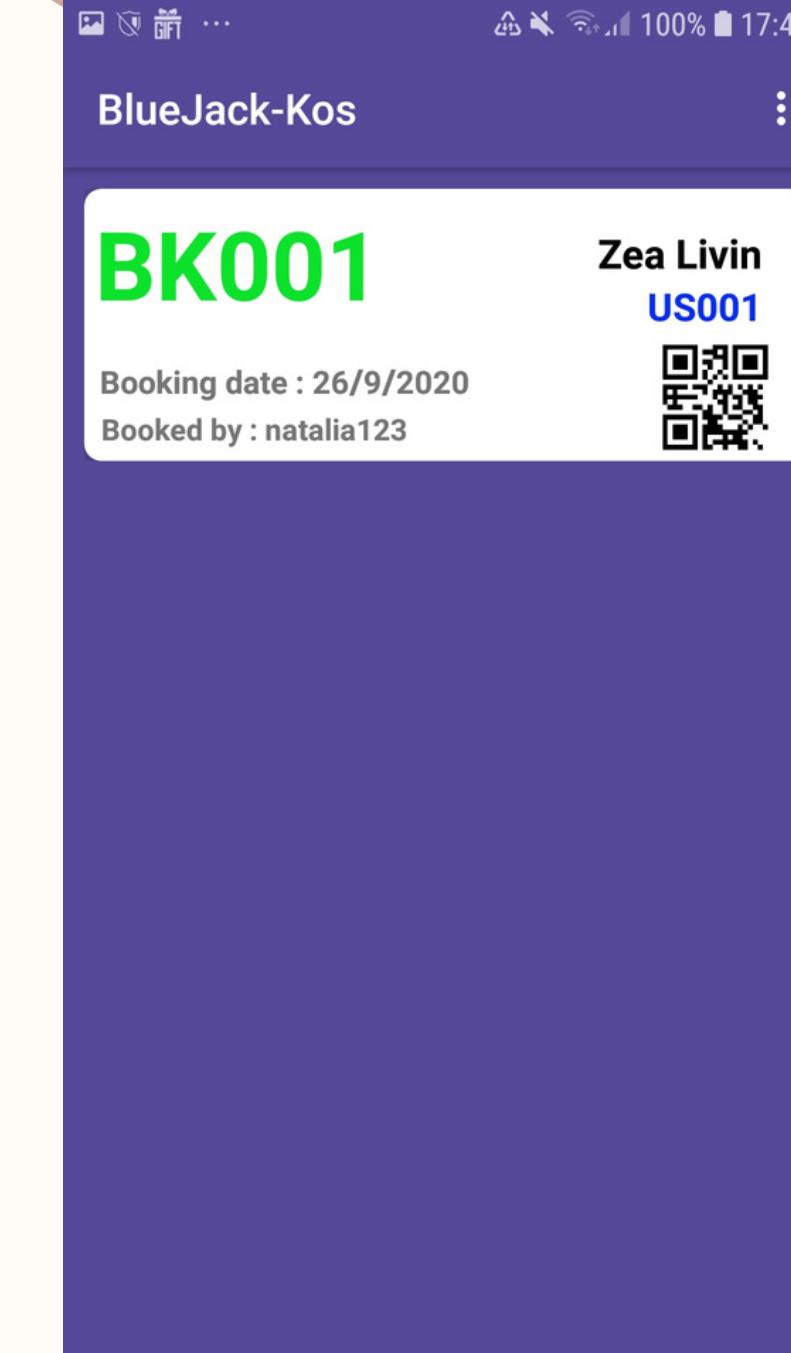

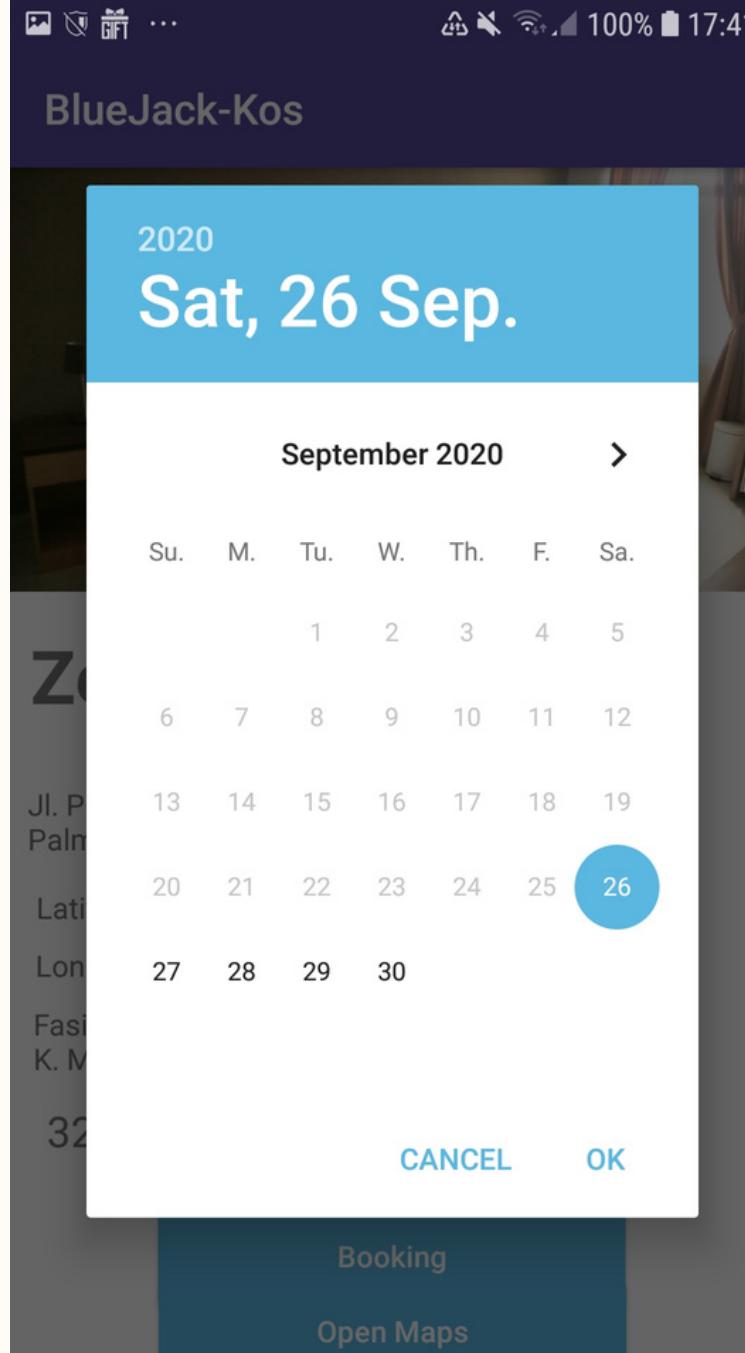

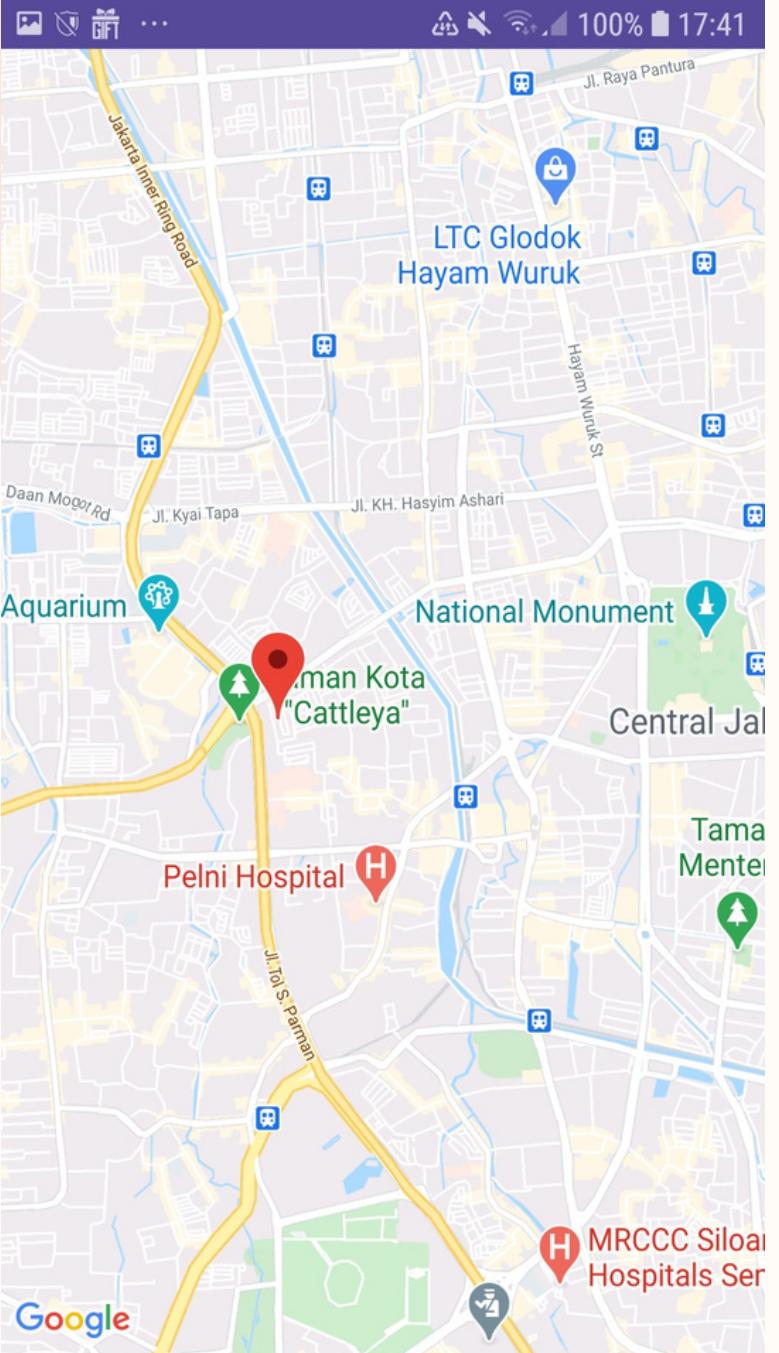

Movie Application uses OMDB API .In this application, user can search and save the selected movies. When the image is long pressed, a button will pop up, either to save or delete the movies. When the image is tapped by a single click, it will show the title, movie's year, IMDB ID, and button to save / delete.

BlueJack Kost

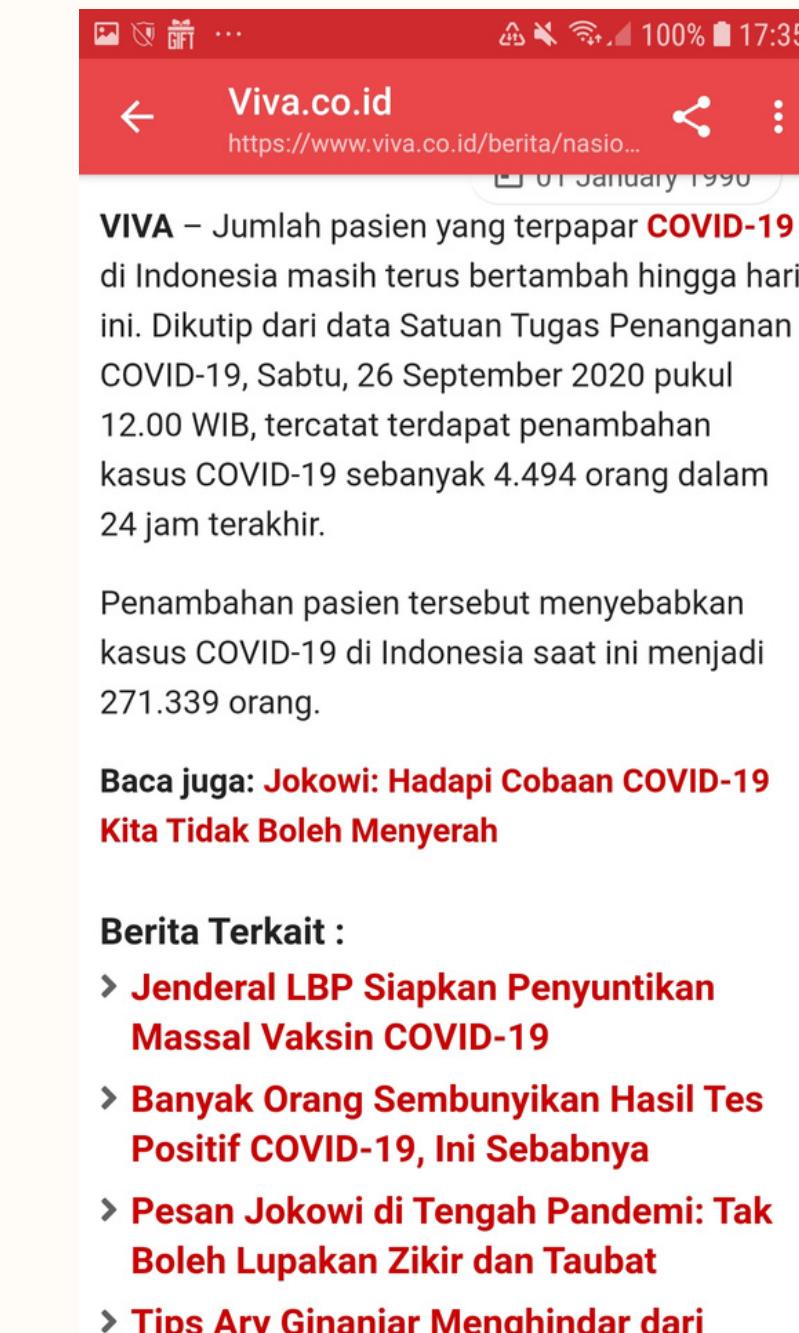

BlueJack Kost is an application to find a kost near you. You can see the location on the map and also the detail about the room (price, latitude, longitude, picture, and facility). You have to log in or registration (if you don't have account) before booking a room and choose the date to stay. You also can cancel your booking.

Covid-19 News

Covid-19 News is a news application about covid. This application use API to get the news. On the home page, it will show the latest news about covid-19

Inventory Application

Inventory application uses local database to save the product name, description, and quantity. The saved products will be shown on home page.

Catch Me

Catch me is a mobile game that me and my team designed for competition by Mogu-mogu company. We use Unity and also photoshop to create this game.
